

## SIGMA-FLEX™ MODULAR BOXSPRING SYSTEM

SIGMA-FLEX™... high quality modular spring system is designed to provide proper load distribution and support for increased bedding comfort and longer unit life. Patented Dyna-Lock™, interlocking design provides uniform support and livelier spring action. The most versatile spring available, Sigma modules feature a limited deflection design with six working torsion bars for impact resistance and proper contouring to body weight. Provides firm, quality support for any mattress, from promotional to premium.

- High strength 10 ga. by 12 ga. welded grid improves bridging and overall mattress support.
- 6 ga. spring steel border enhances edge support and resiliency.
- Sigma modules are designed for fast, positive assembly and give the manufacturer the option of customizing the modules into almost any arrangement of support zones.
- The Sigma-Flex™ Module Boxspring is also available in a high profile 7", and standard 5 7/8" version to accommodate slimmer mattresses, or increase overall bed set height.
- We supply and control the high quality of our wire product from our own wire mills.
- Coast to coast distribution.
- Representatives servicing your area.
